What does it take for a woman to stop time at its track? Find the easy going beauty tips and make up tricks that will help your skin to be at its full potential. All those expensive anti-ageing creams, organic products and very expensive surgeries, what about them, should we forget all about them? Experts say that women who are over 50 might take the chances on these expensive remedies, but (ladies here this) those who are on their 20s, 30s, and even 40s can prevent premature aging just following these simple beauty tips:

Beauty Tip 1: Always Moisturize

Sometimes, all it takes is a good moisturizer and mild cleanser to take years off your face, notes Dr. Miss Narins, she is from the New York University. It is a grave mistake that women who have oily skin skip the moisturizer simply because they believe that it will only make their skin awful, says dermatologist Charles Crutchfield, MD. Oil and moisturisers are 2 different things, according to Crutchfield~Moisture is not the same as oil, they are different~Moisture and oil are 2 different things as Crutchfield says~{Crutchfield says that oil is different from moisture}~{Crutchfield says moisturiser and oil are different}~{Crutchfield says oil and moisture are different}~The mismatch between the use of an oil and moisturiser can be well understood with the description of chalk and cheese as depicted by Crutchfield. Lack of hydration can only make the fine lines and wrinkles become more visible. So before shelling out half of your salary on that anti-ageing product dishes out by that beauty salon, you may want to try out a good moisturiser that suits your skin requirements.

Beauty Tip 2: Keep Up With The Times

In other words, be and stay fashionable. Having a great change in your look is excellent, if you do not have the time for that major make over. Women increasingly start desisting too fashionable and edgy make overs, they like to be updated about latest trends. If women keep track of what 's in vogue regarding hairstyle and footwear every two years, it's ideal. Whatever is your age this way you'll feel good and look young.
