

Crutchfield Dermatology was One of the First Dermatology Clinics in Minnesota to Offer the Latest injectable for Moderate to Severe Facial Lines.

Clinical professor and board-certified dermatologist, Charles E. Crutchfield III, M.D., announced that Crutchfield Dermatology in St. Paul-Minneapolis, Minnesota was one of the first dermatologist to offer new FDA-approved VOLLURE™ XC, a hyaluronic filler to correct moderate to severe facial wrinkle and folds.

(PRWEB) June 08, 2017

Clinical professor and board-certified dermatologist, Charles E. Crutchfield III, M.D., announced that Crutchfield Dermatology in St. Paul-Minneapolis, Minnesota was one of the first dermatologist to offer new FDA-approved VOLLURE™ XC, a hyaluronic filler to correct moderate to severe facial wrinkle and folds.

Dr.Crutchfield, Medical Director of Eagan, MN-based Crutchfield Dermatology, was one of the first dermatologists to offer the latest non-surgical treatment JUVEDERM VOLUMA®XC to add volume to the cheek area and is very excited to be one of the first in Minnesota to offer VOLLURE™ XC to his treatments. JUVEDERM VOLLURE™ XC softens moderate to severe parentheses lines and wrinkles by adding volume to the lines and wrinkles around your nose and mouth to produce subtle and long-lasting results for up to 18 months with optimal results.

"I am so happy to have another tool to erase the signs of aging for my patients. Over time, your face changes in different ways and your skin loses elasticity. This is part of the normal aging process, but environmental factors and genetics also play a role. Serums and creams work on the surface of the skin, but JUVEDERM VOLLURE™ XC will add that needed volume to smooth those moderate to severe lines and wrinkles around the nose and mouth to give subtle and long lasting results. At Crutchfield Dermatology we are committed to providing our patients with the best, most effective and most up to date aesthetic treatments." Crutchfield Dermatology is excited that patients in the Twin Cities can now take advantage of this simple, in office, minimally-invasive procedure that provides instant results with NO DOWNTIME.

Dr. Crutchfield is board-certified in dermatology and is a clinical professor of dermatology at the University of Minnesota Medical School. He is a member of the organization Doctors for the Practice Safe and Ethical Aesthetic Medicine <http://www.safeandethicalseal.org> which ensures that treatments are always performed exclusively by Dr. Crutchfield, one of the leading Dermatologists in the world. He has more experience using injectable medications than anyone in the United States.
